

<b>Application</b>	HVAC
<b>Problem</b>	Fan blade cracks were beginning to form where the blades meet the center hub. Because of the single-piece construction, the entire fan had to be deconstructed on-site to remove it.
<b>Solution</b>	The Marley Ultra Quiet Fan features a separate hub and individual fan blades to allow easy assembly and component replacement as needed. Manual blade pitch adjustment optimizes fan performance.
<b>Results</b>	The tower was restored to safe and efficient operating level. Easy installation of lightweight components – 70% lighter than FRP fans – saved the customer time and money. Quiet operation – up to 12 dBA reduction in sound levels – compared with standard low-sound fans.

*New Marley Ultra Quiet Fan*
