

SERVICE OVERVIEW

There are many cooling tower components that can be difficult to install if not ordered correctly. SPX Cooling Technologies has the right parts that are guaranteed to fit your Marley cooling towers, because we designed the towers and know all the specific components that are necessary to get your tower back up and running. Who has time to spend trying to figure out what components to order separately, or spend time on costly field cutting and drilling to make the wrong parts fit your application? Trust SPX to get the Marley parts you need, and get it right the first time.

SPX SERVICES

- **Fill Installation Kits:**
 - Hanging sheet fill - available in multiple configurations depending on your on-site cell arrangement to reduce install time.
 - Pack fill - available with or without supports to best fit your needs.
- **Hot Water Basins:** All components can be assembled in the field to fit your existing tower.
- **Geareducer® Rebuild Kits:** Multiple kits by Geareducer model that give you all the necessary components to repair your Marley Geareducer, including gears, bearings, seals and even oil.
- **Mechanical Upgrades:** Increase the performance of your existing tower for greater cooling capacity.
- **Sound Reduction:** Mechanical changes to meet ultra-quiet site requirements.

SPX ADVANTAGE

Whether your Marley cooling tower was installed five years ago or 50 years ago, SPX Cooling Technologies knows every component that went into it because we designed it. No other manufacturer has the Marley product line knowledge and expertise that enables SPX to deliver the right Marley parts and get it right the first time.

Why risk using another supplier's products that could result in a loss of overall tower performance or require field modifications to make it fit properly? Trust SPX Cooling Technologies engineering and ratings support to ensure Marley aftermarket kits and parts are designed to fit your tower and deliver OEM performance. Contact your knowledgeable Marley Representative to help you identify the specifics of the parts you need.

A TOTAL SOLUTION

You'll find a full suite of technical services available to help ensure your operation is efficient, optimized and compliant. Where applicable, our technicians and methodology abide by CTI and ASME guidelines; and regardless of process or procedure, our staff is dedicated to delivering the highest standards of quality and accuracy.

Ultimately, what SPX Cooling Technologies offers is the peace of mind that over a century of cooling tower experience can bring. Because we design, engineer, manufacture, and service world class cooling tower brands, it only stands to reason we understand them better, inside and out.

When you need consultative technical services for your cooling towers—whether it's to diagnose or upgrade individual units or entire systems—you need to remember only one name: SPX.
