

PRE-STORM PREP ▪ POST-STORM REPAIR ▪ RENTAL COOLING ▪ 24/7 SERVICE

Steps to minimize damage to your cooling tower in the event of a hurricane

- Shut off electrical supply to the mechanical equipment
- Tie fans down to prevent windmilling
- Remove oil drums, etc. and tie down or remove any loose items on the fan deck
- Secure any loose casing or louvers

SPX Cooling Tech is prepared to help both before and after the storm

Our crews can assist with pre-storm preparations as well as post-storm repairs

- SPX maintains a local inventory of critical cooling tower components
- Our manufacturing facilities are prepared for emergency service
- Engineers are on standby, ready to design temporary repairs or custom solutions to bring your tower back online quickly and efficiently
- Temporary cooling partners available to assist in delivering the extra capacity you need to keep running
- Available 24/7
