

# Hurricane & Natural Disaster Preparedness for Cooling Towers

## PRE-STORM PREP • POST-STORM REPAIR • REPLACEMENT TOWER • 24/7 SERVICE

### Steps to minimize damage to your cooling tower in the event of a hurricane

- Shut off electrical supply to the mechanical equipment
- Tie fans down to prevent windmilling
- Remove oil drums, etc. and tie down or remove any loose items on the fan deck
- Secure any loose casing or louvers
- Hurricane reinforcement options

### SPX Cooling Tech is prepared to help both before and after the storm

Our crews can assist with pre-storm preparations as well as post-storm repairs

- SPX maintains a local inventory of critical cooling tower components
- Our manufacturing facilities are prepared for emergency service
- Engineers are on standby to design temporary repairs/custom solutions to bring your tower back online quickly and efficiently
- Temporary cooling partners available to assist in delivering the extra capacity you need to keep running
