

# MCW cooling tower

## The ideal solution for urban and industrial applications.

The new Marley MCW cooling tower from SPX Cooling Tech is simply the most effective available today for sound- and space-sensitive applications:

### Low noise

Centrifugal fans and a fully-enclosed falling water area create one of the quietest cooling tower configurations on the market.

### Small footprint

Forced-draft, counterflow design requires considerably less plan area than crossflow towers typically use.

### Indoor friendly

Because of its low noise, small footprint (with knockdown option) and inlet/outlet ducting, the Marley MCW is your best option for indoor HVAC applications.

High-performance inside and out.

Low-sound forward curved centrifugal fans overcome the static pressure imposed by external ductwork for quiet indoor operation

Fully-enclosed falling splash zone water area ensures low noise

Heavy-duty construction heavy-mill galvanized and stainless steel option

Air movement system is belt-driven by means of wedge-belts sized for 150% of the nominal power

Water distribution system includes PVC lateral subsidiary pipes and low-clog polypropylene nozzles

The Marley MCW Series maximizes forced-draught, counter-flow technology and high-performance fill media to deliver fully-rated cooling over a wide range of flow and temperature requirements.

Low air resistance  
keeps power consumption  
to a minimum

Factory-design tested and  
rated sound attenuators  
available for air inlet  
and discharge

## Built with your material needs in mind.

The Marley MCW offers a choice of galvanized or stainless steel construction, depending on your application and installation demands:

MCW Cooling Tower – specify heavy-mill galvanized steel or stainless steel (grade 300 or 316) for high-performance under any operating conditions.

Both options are designed to meet the corrosion resistance, equipment life and budgetary requirements of your most demanding HVAC and light industrial applications.

## What to spec when you demand the best.

When siting concerns and noise pollution issues demand more out of a cooling tower, the Marley MCW from SPX Cooling Tech sets the benchmark for guaranteed thermal performance – and delivers low maintenance, versatile options and outstanding value.

CTI Certified... Backed by a five-year mechanical equipment warranty... Specify the Marley MCW to meet your need for high-quality urban cooling.
